PROVIDENCE CHILDREN'S FILM FESTIVAL

WE BRING THE WORLD TO RHODE ISLAND

Thanks to YOU, we have created one of the top four children's film festivals in North America!

YOUR SUPPORT ALLOWS US TO...

delight

...show films that reach into our lives and resonate with **all** of our emotions. It's what PCFF is all about. Children deserve great films that spark their imaginations with larger truths and bigger ideas.

Creating animations is an international passion. Every year we search the globe to find some of the most unique animations being made. Often they alter your perception of the worlds around you.

educate

...teach the art and craft of filmmaking.

Media literacy is a key component of our mission. Once you create a film of your own you will never watch **any** other film the same way again.

PCFF offers several ways for young minds to become more media literate. Some kids join our Community Jury to watch, deconstruct and critique films together. For a more hands on experience, we offer filmmaking workshops that often leads to understanding/interpreting films in a whole new way.

inspire

...inspire our community through films that speak directly to **YOU!** Often, it takes learning about someone else's passion to empower you to discover and develop your own!

In the documentary JULIETA AND THE TURTLES, fourteen year old Julieta of Curaçao is on a mission to take as much plastic out of the ocean around her as possible. She sees firsthand how detrimental it is to the sea turtles that nest there and is determined to clean it up! We asked, "What can you do for your favorite beach here in New England?"

connect

...take a film to the next level. Watch a film and then... learn to tap dance, meet a falcon, or get an FX scar! We connect elements of the films we show to our own communities through workshops and events.

This year we screened the controversial film ON THESE GROUNDS. This thought-provoking documentary suggested that there are better options other than police officers to staff as school resource officers. The consequences were disturbingly apparent in a Georgia classroom and soon after Rhode Island had a very similar situation occur in Providence.
